Arris modem quick start guide

If not, contact your service provider. You may be asked to provide the MAC address and Serial number listed on the modem label on the bottom of your SB6121 (see back page for details). It contains specific ID information for your modem. To receive cable service, your service provider may request the Media Access Control (MAC) address (see HFC MAC ID) and Serial number (see S/N) listed on the modem label. Note: If all three LEDs did not light up SOLID, contact your service provider. The LINK LED should FLASH during data transfer. All rights reserved. - If it opened, your modem was set up properly. - If it did not open, please contact your current service provider to set up your Internet service or activate your modem. Connect the Ethernet cable to the Ethernet port on your computer (or other device) and to the Ethernet port on the rear of your SB6121. Check with your service provider for more information. Other trademarks and trade names may be used in this document to refer to either the entities claiming the marks and the names of their products. Connect the power cord to the Power port on the rear of your SB6121 and then plug it into an electrical wall outlet. Modem Label Place Label Here During normal operation, the POWER, RECEIVE, SEND, and ONLINE LEDs should always be lit SOLID.
